

LifeGames School Press Promo - Advice on taking great photos

Fortunately, thanks to the quality of most modern smartphones, this document need only be short and sweet!

Here are a few pointers for taking photos of the kids enjoying the LifeGames activities that have the best chance of being published:

- Ensure there is sufficient light
- Try to avoid photographing brand names, eg. on clothing, etc.
- Focus on natural activity shots rather than getting the kids to pose
- Include one whole class pose
- Avoid smartphone camera filters, eg. cat ears, etc.!

And finally, think about the kind of images you see of school children in your local paper and use these as a guide for taking your own class photos.

Remember to limit your photos to 3-5 maximum for sending purposes.

Happy photographing!
